

CAPABILITY STATEMENT

BUSINESS SUMMARY

W.E.B. Computer Services is an Information Technology Consulting Company that provides solutions, to support your critical business infrastructure, based on engineering principles rather than sales quotes. Our focus is building network infrastructure for voice, video, and data. We work with both the federal and local government to small and mid-size corporations. W.E.B. Computer Services was founded by Warren Burgess, a Vietnam Era Service Veteran, with over 30 years of experience in this field from Desktop Support to Network Infrastructure Planning and Design.
